MSP1 | Cyber Security Solutions & Services

MSP1 Digital Forensics Services

Today's prevalence of electronic data demands a reliable proven solution. At MSP1, we provide a leading-edge service combined with a wealth of experience in conducting investigations on a broad range of digital media including computers, mobile devices, networks and audio video footage.

We operate globally and have completed investigations in Europe, North America, Asia and the Middle East.

As such we are well placed to offer our clients local expertise within a global context. As a boutique service offering, MSP1 can provide expertise to rival the 'Big Four' whilst maintaining cost efficiency.

MSP1 is well placed to respond to the varied and specific requirements of our clients. All our forensic investigators are approved expert witnesses and courtroom trained.

We understand the importance of the security, confidentiality and sensitivity of our clients' electronic data. Our investigators are supported by an experienced team of people including a dedicated account manager assigned to each case and a secure courier service for the responsible transportation of exhibits.

Digital Forensics

Using the latest forensic techniques, MSP1's expert investigations team is able to examine a myriad of digital media including computers, mobile devices, networks and audio video footage. We sort fact from fiction and crystallise ambiguity. Our extensive expertise, spanning a broad range of investigations, places your enquiry in the safest and most experienced hands.

Computer Forensics
Collecting, extracting, interpreting and presenting digital evidence stored in digital media

Mobile Device Forensics
Recovering and analysing data stored on mobile devices, SIM cards and media attachments

Audio Video Forensics
Analysing, enhancing and transcribing audio and video evidence, including demultiplexing CCTV footage

Network Forensics
Examining digital evidence in an operational environment

Forensic Services	Market Sectors	Expertise
Digital forensics	Legal & professional	Serious & complex crime
eDisclosure	Regulatory & law enforcement	Intellectual property
Incident response		
Forensic readiness planning	Private sector	National security & terrorism
		Litigation & dispute resolution
		Strategic incident response

Cell Site Analysis

Pin pointing the exact geographical location of a mobile device when calls, SMS or downloads are sent or received

Analysis of Call Data Records

Reviewing call lists to establish relationships between contacts or to determine a geographical area

Data Collection

Capturing and preserving data from digital media to maintain the evidential integrity

eDisclosure

MSP1's unique edisclosure offering incorporates both computer forensics and litigation support, providing a true managed end to end solution. We streamline the litigation process through providing best of breed software solutions matched to client requirements combined with forensic expertise in complex edisclosure procedures.

Our managed solution will accelerate the process, lower the cost and make edisclosure more accessible. We can handle the collection, preservation, processing, analysis, review and production of electronically stored information. MSP1's edisclosure solution provides secure hosting as required and online review tools to facilitate the litigation process.

The benefits of MSP1's managed end to end edisclosure solution include:

- Accelerate early case assessment
- Decrease the volume of irrelevant data by 90%
- Increase review throughput
- Reduce movement of data across multiple tools
- Improve the defensibility of the edisclosure process

Incident Response

The collection and preservation of data can be critical. Seconds count, and delays can have a severe impact on the finances and reputation of the company. It is also of utmost importance that data is preserved using forensically sound methodology to maintain its integrity.

At MSP1 we understand the time critical element of certain cases. Our experienced team of investigators is available 24 hours a day to respond to nationwide incidents.

Whether it's the execution of a search order granted at the last minute or the dispatch of a team to collect data from multiple locations, we can assemble a rapid reaction team and send them anywhere in the world.

If required, we are capable of performing the investigation in situ and reporting our findings back to you, so you can implement the next stages of your enquiry without delay.

Forensic Readiness Planning

A digital forensic investigation usually takes place post-event in response to a computer related crime or information security incident. Forensic readiness planning, however, enables an organization to take a pro-active approach to maximise the potential to use digital evidence whilst minimising investigation costs.

In a business context there is the opportunity to actively collect potential evidence in the form of logfiles, emails, back-up disks, portable computers, network traffic records, and telephone records, amongst others. This evidence may be collected in advance of a crime or dispute, and may be used to the benefit of the collecting organisation if it becomes involved in a formal dispute or legal process.

It is necessary from the outset to consider the importance of evidence and to be prepared to gather it for a wide range of scenarios, for example:

- Threats and extortion
- Information compromise
- Accidents and negligence
- Stalking and harassment
- Commercial disputes
- Disagreements, deceptions and malpractice
- Property rights infringement
- Economic crime e.g. fraud, money laundering
- Content abuse
- Privacy invasion and identity theft
- Employee disciplinary issues

MSP1 | Cyber Security Solutions & Services

MSP1 helps businesses fight cybercrime, protect data and reduce security risk. With cloud and managed security services, integrated technologies and a team of security experts, ethical hackers and researchers, we enable businesses to transform the way they manage their information security and compliance programs.

With automation, tools and intelligence, we find better ways for businesses to overcome their security challenges. Our qualified security assessors, ethical hackers and other experts are some of the industry's most trusted sources for risk assessments, threat research, forensic investigations, and security training.
